EDUCATION

Brigham Young University

Bachelor of Science: Computer Engineering

Apr 2027

Provo, UT

- GPA 3.97 | Full-tuition scholarship | Dean's List (3 semesters)
- Clubs: Semiconductor & AI Policy

EXPERIENCE

Chick-fil-A Support Center

May 2026–Jul 2026

Software Engineering Intern

Atlanta, GA

- Engineered security tooling for a cybersecurity team, including a Python CLI tool for platform automation and a pre-commit hook to enforce secure coding standards
- Researched and evaluated local secret storage solutions to reduce credential exposure risk (dotenvx, sops, AWS)

BYU Athletics

Dec 2025–Present

Software Engineer

Provo, UT

- Architected the initial CI/CD pipeline and test suite across multiple repos, writing over 500 unit, integration, and e2e tests
- Developed an injury reporting app using voice-to-text and AI to automatically parse speech and populate report fields, reducing manual data entry for athletic staff

Valley Women's Health

Aug 2022–May 2024

IT Technician

Provo, UT

- Assumed primary IT responsibilities within two months, supporting clinical staff across the organization
- Resolved 100+ technical issues independently across software, networking, and hardware

PROJECTS

Laser Tag Gun • Embedded Systems • ESP32, C, Custom PCB, Analog & Digital Filters

- Designed and fabricated custom PCBs with IR photodiodes for hit detection, and built analog filter circuits alongside IIR and FIR digital filters to eliminate noise from IR signals
- Implemented full game logic in C including lives, deaths, and team mechanics across multiple player units

AnkiEx • macOS App • Swift, Supabase, OpenRouter

- Built a macOS system extension that captures highlighted text via keyboard shortcut and uses AI to generate flashcards, pushing them directly to Anki
- Secured API key management via Supabase Edge Functions, routing AI calls through OpenRouter without exposing credentials client-side

Kapolei Tools • Web App • React, TypeScript, Firebase

- Built an internal operations dashboard for a Chick-fil-A franchise featuring hold time tracking, prep estimation, and automated waste reporting
- Integrated real-time data sync via Firebase and delivered analytics tooling for operational monitoring

Chess Game • School Project • Java

- Built a multithreaded chess server supporting multiple concurrent client connections with a terminal-based GUI
- Implemented full game logic, client-server communication, and session management from scratch

SKILLS

- **Languages:** Python, C++, JavaScript, TypeScript, Java, SQL, HTML/CSS
- **Hardware:** ESP32, Arduino, Raspberry Pi, Custom PCB Design
- **Tools:** Git, GitHub Actions, Docker, Jira, Snyk, AWS, Vercel
- **Concepts:** CI/CD, REST APIs, AI-Driven Development, Agile, OOP
- **Languages (spoken):** Mandarin Chinese (advanced proficiency)
